Remedial Investigation - Well Survey
=====

Under the direction of the U.S. Environmental Protection Agency, Mass Merchandisers, Inc. is conducting a survey to determine the number and location of private wells and natural springs in the vicinity of the Arkwood Superfund site. Information gathered during this survey will be used to identify wells and springs that will be sampled as a part of our field investigation of the contamination at the Arkwood site.

This sampling is expected to begin in April 1987. These samples will be collected on a quarterly basis and the results will be provided to the property owner and any known users. If your well or spring is scheduled for sampling, every effort will be made to contact you in advance.

Your cooperation in this endeavor is greatly appreciated. If you have any questions regarding this Superfund site, please call or write:
